THE HOME PLANET PLAYLIST: DEVELOP

Celebrating its 25th year, it's clear that early career scientists stan NASA's DEVELOP program.
♥ Here's a BTS (behind the scenes) look at how DEVELOP works:
♥ Choreograph your career with 10-week feasibility studies — no dancing required
♥ Collaborate with a band of fellow scientists to solve real-world challenges
♥ Take center stage with the skill-building help of mentors and science advisors
