THE HOME PLANET PLAYLIST: DISASTERS MAPPING PORTAL

Hey! Ho! Let's go map disasters! There's no need to clash with the Disasters Mapping Portal — it helps experts rise up and build resilience in their communities. Disasters ain't no picnic, but the portal tracks and visualizes them in near-real-time. By improving how we predict, prepare for, respond to, and recover from hazards and disasters, the portal brings power to the people.
